

ABACAN™

CONTENTS

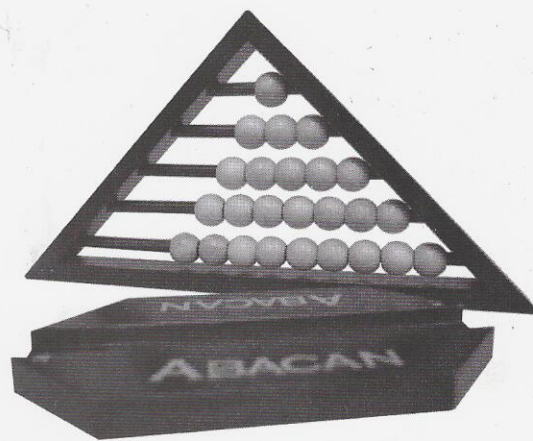

- 1- Abacan Game
- 1 - Game Base

OBJECTIVE

To force your opponent to have to slide the last bead.

SET UP

Remove the game from the packaging and slide all beads to one side of the game as shown in image at right.

TO PLAY

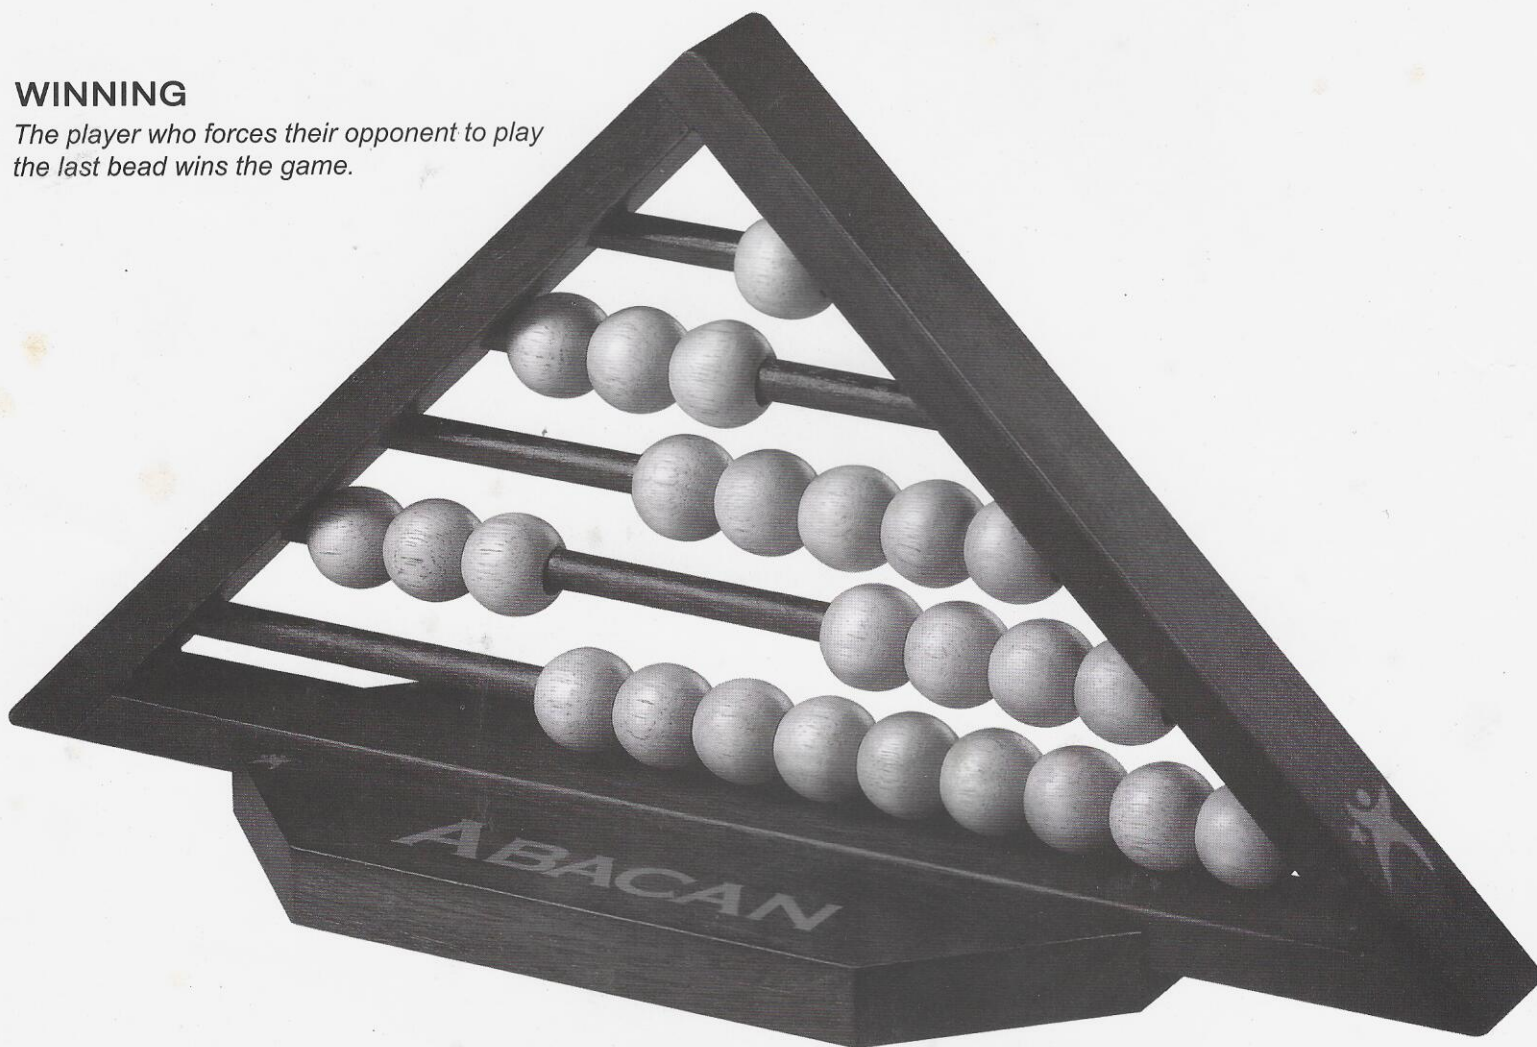

Players determine which player will play first. Starting with all beads to one side of the game, the first player slides one, two or three beads on any single bar from the starting side to the opposite side of the game. Players then alternate turns, each turn consisting of a player sliding one, two or three beads on any single bar from the starting side of the game to the opposite side of the game. Play continues until one player forces their opponent to play the final bead.

Important rules for playing ABACAN are:

- Beads are only played in one direction during a game.
- Any turn can be played on any bar.
- All one, two or three beads played during a single turn must be on the same bar.
- The final bead can be on any bar.

WINNING

The player who forces their opponent to play the last bead wins the game.
